

Name: _____

Math 105B: Fall 2012

Quiz 4: October 31

Correct answers accompanied by incorrect or incomplete work will not receive full credit. Good Luck!

1. Find the derivative of $f(x) = \frac{\arcsin(x^3)}{x^5}$

2. Consider the equation $x^2y + x^4y^3 = 10x$.

(a) Use implicit differentiation to find a formula for $\frac{dy}{dx}$ for the equation.

(b) The point $(1, 2)$ is on the graph of the equation. Find the slope of the line tangent to the graph of the equation at the point $(1, 2)$.

OVER

3. Find the derivative of $y = \ln(2 + \cos(5x))$.
